26 He subscribed 50 shares on behalf of the Commonwealth in the stock of the Corporation of the board of internal improvements for Franklin County there being 50 shares subscribed likewise by individuals
He made the following Communications to the Gov. of Tennessee

Executive Department
Frankfort July 26. 1834

Sir

I have the honour to enclose you a Copy of a Report and Resolution of the House of Representatives of this State adopted by that house at the last session of the General assembly, to which it is made my duty to solicit Your Excellency's attention. Having no official information that such a Resolution as that alluded to in the report of the Committee, has been passed by the Legislature of Tennessee, I can do no more for the present than very respectfully to make the enquiry of your excellency. Should it result that such an act is in force in Tennessee, and that it is intended to assert the Jurisdiction of that state over the territory which is included within the limits embraced by the triangle represented on the plat of the survey made by Mess. Bright & Brunsell in 1830 and a copy of which is no doubt on file in the executive Department of your state, I would call the attention of Your Excellency to the terms of the report made by those Gentlemen, and especially to the Compact or agreement made by Commissioners of our respective states in Frankfort, on the 2d of February 1820, which were duly ratified by the General assembly of Kentucky on the 11 of February of the same Year, Waiving in this Communication any examination into the validity or invalidity of the title, which the State of Tennessee may have to the territory which has been so long the subject of negotiation and dispute I shall feel myself indebted to Your Excellency for a copy of any act which the legislature

Do

of Tennessee may have adopted of late, on the subject, & a suggestion of the views of known to Your Excellency which on the part of ~~Your Excellency~~ the Legislature may have led to its adoption. It is alike due to the faith of the respective states, and the mutual good understanding which subsists between them, and which it shall be my endeavour carefully to maintain, that the policy of either in relation to the contested question of the boundary between them, should be reciprocally understood, so that its adjustment may be founded on a friendly and satisfactory basis. It has not I venture to say, entered into the contemplation of the Legislative authority of this state, that any further legislation was necessary on the part of either state, on the subject of the boundary, especially since the report of Messrs Bright & Munsell, had shown so satisfactorily, that the reputed line from the buck to the black jack and from the black jack to the elm on the Simpson County line, was regarded and observed by the citizens of Tennessee and Kentucky respectively as the true boundary line, and that the Jurisdiction of this state over the territory included within those limits had not, by these citizens, been seriously called in question;- thus bringing that line within the terms of the stipulation contained in the first article of the compact or ~~agreement~~ agreement signed by the comm.rs in 1820. If a different view has been entertained by Your excellency and has led to the adoption of any measures, inconsistent with the construction which the people of Kentucky have placed on that stipulation. I will be thankful to your Excellency for a full & ample expression of it In order that the grounds in which the State of Tennessee now rests her claims to jurisdiction over the territory in question, may be distinctly understood and that an opportunity may be afforded for a final settlement of the claims of the two states. I have the honour to be &c

James T Morehead

His Ee Gov: Carrol
