Sir, Mr. Oliver has this moment arrived from Fort-Meigs with a verbal message from Gen.l Clay to Major Gen.l Harrison informing him that the British and Indians have again crossed that place - They were discovered on the opposite side of the River yesterday morning just after reveille - the Indians had crossed over in the night and succeeded in killing & taking off seven of the picket guard - the force landed in view of the Fort from the Gun boats was estimated at 1500 British troops, besides those that had taken their position in the night. Early last night the enemy took possession of the point on this side the river 200 yards below the Fort when they were erecting batteries - Our batteries opened yesterday morning, and we have heard several guns this evg. There are twelve Gun boats (4 of them rigged) now in view when Mr. Oliver left the Fort - Gen.l Harrison left ~~the~~ Gen.l this morning at Lower Sandusky - he has 500 regulars 100 Militia with him & Col. Paul is within 22 miles of Head quarters with 500 of the 27th Regt, and there are 100 of the 24th Regt after miles further in advance
